

Welcome to the Scaled Agile Framework® (SAFe®)

The Scaled Agile Framework (“SAFe”) is a proven knowledge base for implementing lean-agile practices at enterprise scale. It has been successfully applied to programs ranging from 50-125 people, to enterprises engaged in multiple programs of change in numerous portfolios. The "Big Picture" below highlights the individual roles, teams, activities and artifacts necessary to scale agile from the traditional 4-9 person team through program up to enterprise level initiatives. Whilst software development focused, the principles and concepts that underpin SAFe can be leveraged for any change initiative.

The SAFe framework caters for three levels that span the enterprise:

Team, Program and *Portfolio*. Each of these scales the essential agile elements of *Value* (strategic alignment, investment classification and prioritization, economic and value driven pipeline and requirements management) *Teams* (integrated and collaborative cross-functional teams orientated around delivering real-work outcome) and *Timebox* (incremental, bite-sized delivery and budget periods that produce releasable components/solutions).

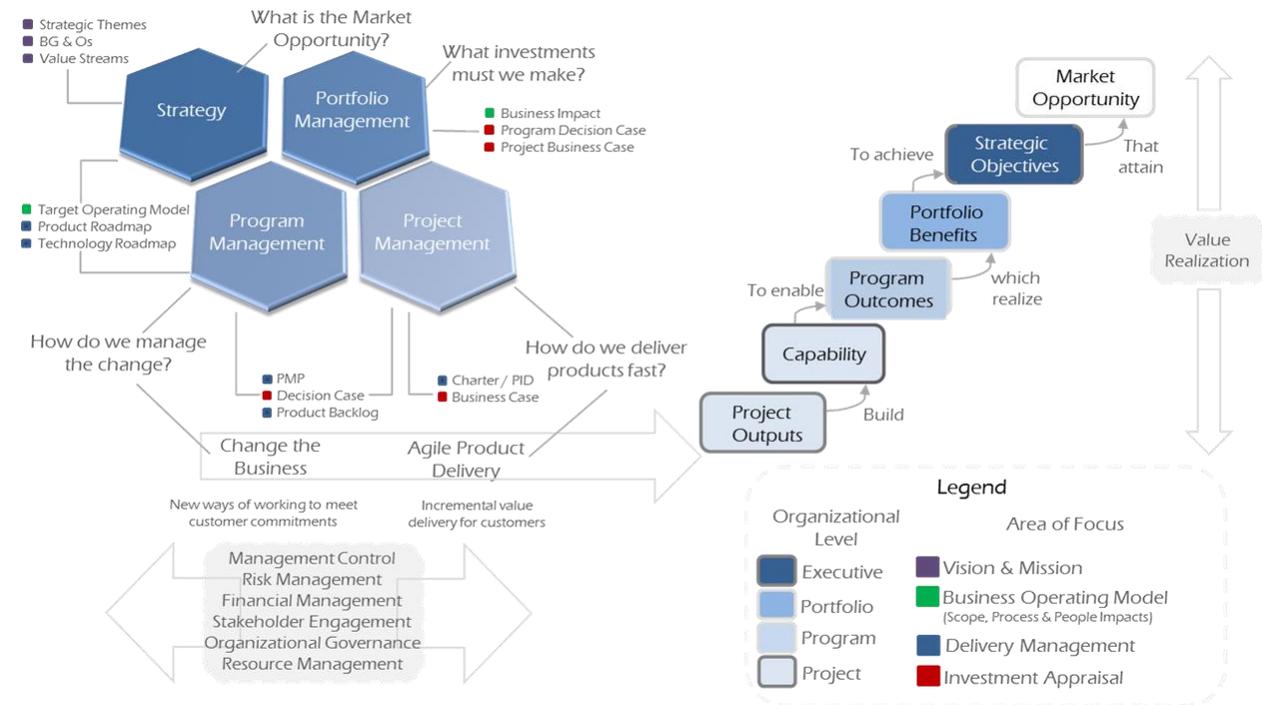

Clicking on each icon takes the user to an Abstract and a Detail page which elaborates on that element. Some elements (like Metrics) bring up additional sub-domains with navigation to further depth and description.

SAFe is a powerful model with customizable components that can be leveraged to the organizational and situational context, the key principles that form the foundation of the framework have demonstrable, proven results in terms of engagement (+10 - 35%), productivity (+20 – 50%), Quality (incurring fewer defects +50%) and time to market/internal utilization (+30 – 75%).

Building Strategic Agility for a Fast-Moving World

Today's organizational situation is complex and non-linear. Uncertainty, volatility, ambiguity, and a relentless pace of change is the new norm. The adaptive capacity of the organization and its leaders - to effectively navigate this environment - is critical to manufacture success.

We've drawn on decades of strategy, portfolio, program, project and change leadership experience to help organizations embrace change, encourage innovation and drive the creativity needed for transformation and growth. Combined with our Governance expertise, P3O¹ and various accredited assessment and solution delivery toolkits² we enable high performing organizations maintain their edge.

Practical Ways to Tackle Difficult Challenges

As an APMG-International Accredited Training Organization, our professional facilitator/consultants optimize the learning experience by bringing current, real-world experience into the classroom. We enable organizations through world class, proven-practice professional credentials in the following disciplines.
